The Ministry of Public Health Thailand by Bureau of Epidemiology is offering a new batch of two-year program, "International Field Epidemiology Training Program – Thailand (English program)," scheduled **June 12, 2017 to May 31, 2019**. If you would like members of your staff to attend, please submit application to program before March 30, 2017.

This course is open to Asia-Pacific medical doctors and veterinarians, who need to apply epidemiology for public health services in every level of the country.

Visit <http://www.interfetpthailand.net> for additional information such as application form, course outline, facilities and scholarship etc.

RATIONALE:

Thailand Field Epidemiology Training Program (FETP) is with the longest history of field epidemiology training besides north America. Within the first decade of the International Field Epidemiology Training Program (IFETP)-Thailand, we have trained more than 200 Thai medical doctors, 20 Veterinaries since 1980 and 45 international graduates for Asia countries – Myanmar, Vietnam, Malaysia, Laos, China, Bhutan and Cambodia since 1988 and distributed to Ministry of Health in South-East Asia countries. The graduates' contribution for public health surveillance and response in this region is increasing gradually. Many graduates work as key person for surveillance and response public health events such as Ebola, MERS-CoV in their countries and many pieces of field works during the training were accepted for oral and poster presentation in well-known field epidemiology conference.

TRAINING LOCATION

FETP training Center, Bureau of Epidemiology, Ministry of Public Health, Thailand.

BENEFITS

To participant –

- Gaining skills in modern epidemiological and statistical methods under working condition
